### Target Market

---

Customers in the target market are customers who want to:

- finance the cost of buying land and building on it (including House and Land) or finance the building of a residential property to live in or for investment purposes;
- mortgage the property by way of security;
- borrow between \$10,000 and \$2,000,000;
- repay the loan over a term of between 5 and 30 years
- make interest only repayments during the construction period and make principal and interest repayments over the remaining term;
- borrow not more than 90% of the value of the land and building;
- have the loan interest rate variable or fixed.
- customers may also finance the cost of buying land and purchasing a transportable home or finance the purchasing of a transportable home or finance significant home improvements.

Customers must be 18 years of age or over.

Customers may have already owned real property and obtained a home loan, or may be buying a property and obtaining a home loan for the first time. Customers will therefore have differing levels of knowledge and experience with home loans including, potentially, very little or no such experience.

Customers are not in the target market if they:

- are not building / constructing a house;
- want a split loan option;
- are owner builders.
